

## Healthx Product - Member Portal

### Portal Solutions for Every Unique Need

Every person visits your website for different reasons and has a unique set of business requirements and self-service expectations. Healthx gives you the ability to provide your member community with the web tools they need in order to interact with you the way you want.

Our on-demand, cloud-based services allow you to customize the presentation and services within the portal for each of your user types. Members come to your site with different needs, which you can fulfill through the Healthx Portal solution. All of our portals are built on an open platform, so they are easy to build, maintain, and enhance. Documents, links, and information you provide in one portal are automatically available to be used in another portal. This makes maintenance a snap. Adding a new product? It is instantly updated in all your portals, free from disruption.

### Customize It for Increased Member Satisfaction

Healthx portals are customized with the look and feel of your choice, allowing you to maintain control of an overall framework while providing the flexibility you need to work with different groups independently. Each portal can display your's or your group's branding colors easily, without the need of IT support.

Looking forward to that perfect portal experience to drive engagement? The Healthx Member Portal is a step in the right direction. Find out more at [www.healthx.com](http://www.healthx.com).

## Increase Engagement While Reducing Costs

The Healthx Member Portal comes with solutions to help you communicate with and engage your members. For example, our clients improve member engagement and portal usage with our online EOB Notification Service. Members receive an email when their statement is ready, which directs them back to the site. This application makes it easier for members to view their statement and increases site usage.

You can also access Healthx's Communication Services and offer your members several updates via text message, such as Flexible Spending Account balances or claims statuses.

Our Single Sign-On (SSO) solution reduces the frustration of members trying to remember multiple usernames and passwords. Our SSO tool allows your members to access third-party vendors such as benefits, enrollment, pharmacy, disease management, and more using only one username and password.

Healthx portal and technology solutions are key in helping you to support more members and drive better quality of care, all while reducing costs.

Looking forward to that perfect portal experience to drive engagement? The Healthx Member Portal is a step in the right direction. Find out more at [www.healthx.com](http://www.healthx.com).

Healthx develops and manages the most widely adopted online portals and applications for the healthcare market.
