

Healthx Product - Provider Portal

Connecting with Providers.

With today's changing reimbursement and contracting models, Health Plans are working to ensure that they are giving their providers the tools that they need to effectively manage the care that their members require....and at the same time, are successfully managing their performance contracts.

Provider demand for online access to patient information has become a standard due to the cost and time savings associated with this new era of electronic self-service. Healthx engages the provider and notifies of events that are important to them in the format of their choice. Through the use of Outbound Fax and Email Notifications, providers receive alerts that give them the relevant information that you want them to have.

Administrative Services

Healthx Provider Portal enables providers to conduct a wide range of self-service transactions and inquiries in a secure online web environment. These services include both administrative and clinical services.

Administrative services available on Healthx Provider Portal are:

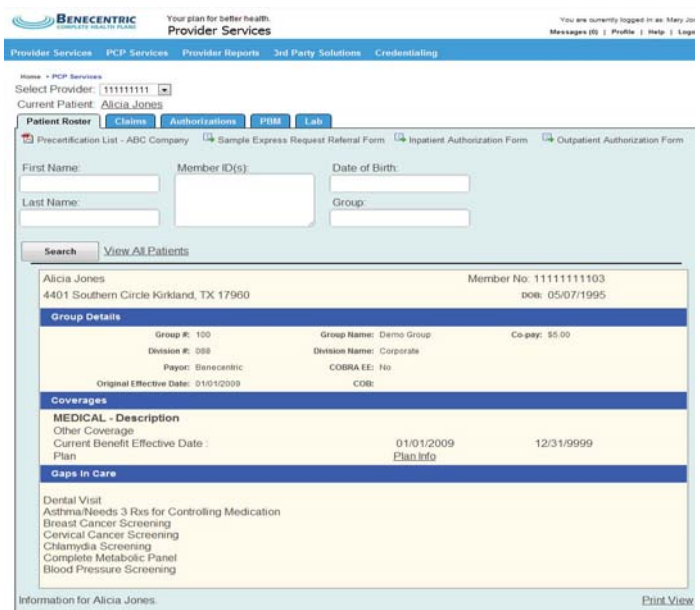

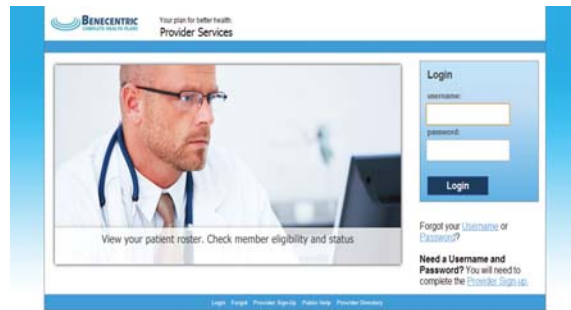

- Provider level demographic detail
- Member Eligibility detail
- Benefit Summary for eligible members
- Claims detail
- Submit and validate Authorizations
- Charges and insurance information

Looking for that perfect portal experience to drive engagement? The Healthx Provider Portal is a step in the right direction! Find out more at www.healthx.com.

Clinical Services

Health Provider Portal Clinical Services are designed to facilitate a provider's access to the complete patient record. Healthx Provider Portal Clinical Services are presented in a user-friendly "clinical dashboard" that integrates relevant patient data from multiple data sources that can be connected to the health exchange or on a stand alone basis. Healthx Provider Portal Clinical Services presents timely patient information to the patient's doctor and other members of a care management team. The result is timely and actionable patient information where and when it's needed. Clinical Services available on Healthx Provider Portal are:

- Patient demographics
- Medication histories
- Changes in patient roster
- Encounter/visit information
- Reminders and alerts of preventive care need by patients
- Electronic delivery of HEDIS reports
- "Gaps in Care" required by patients
- Patient's involvement with Disease Management programs
- Clinical messaging (doctor -to-doctor and doctor-to-patient)
- Integration with laboratory results
- Communication of changes in managed care contracts

Healthx develops and manages the most widely adopted online portals and applications for the healthcare market.
