## Healthx Platform Core Applications - Branding

### Connect Your Company with Your Users with Easy-to-Use Customization Tools

Healthx provides front-end Branding tools for your web sites that allow for full customization. You, as the administrator, have complete control of all aspects of the branding and look and feel of your site.

### More than Just Pretty Colors - It is Your Company's Image

Colors, fonts, and style sheets can be used to seamlessly mirror your public domain site. Simply import a few company logos and graphics, select fonts and background colors and the entire look and feel and your site instantly takes on that of your product and services. A very important aspect of the Healthx Branding tools is that they allow for each user and administrator to access only the menu items, functions, search engines, etc., required by the individual user -- automatically at log in. This is all handled invisibly by the Healthx Platform. Healthx can help you not only do a better job of communicating with your client base, but you'll look better in the process.

**Core Applications are built into the Healthx Platform. They are ready to go from day one. Find out about the Healthx Platform Core Applications in the Healthx Application Marketplace at [www.healthx.com](http://www.healthx.com).**
